1. KORIL-RDF GENERAL

1.1. Introduction

The Agreement on bilateral cooperation in private sector industrial research and development between Korea and Israel was signed on November 25, 1998.

The Ministry of Trade, Industry & Energy (MOTIE) of Korea and the Ministry of Economy and Industry (MoEI), Israel Innovation Authority (IIA) are the two Cooperating Authorities for implementing this Agreement.

The objectives of the Agreement are to:

- Share experiences in national R&D policies and programs of each country;
- Promote the activities of each private sector to intensify bilateral industrial R&D cooperation;
- Facilitate the identification of specific projects or partnerships between Korean and Israeli companies that can lead to industrial R&D cooperation;
- Coordinate and focus suitable government resources and programs to enhance commercial relations and industrial cooperation including the establishment of a joint industrial R&D cooperation initiative;
- Give expression to the initiative through the establishment of an Industrial R&D Fund between Korea and Israel to support mutually agreed Industrial R&D Cooperation Projects between entities from the Parties, leading to commercialization in the global market and, in particular, the Asia Pacific region.

In accordance with the Agreement, both countries contribute an equal sum of USD 2 million per year to the Korea-Israel Industrial R&D Foundation (KORIL-RDF).

The Foundation supports industrial R&D projects that lead to potential commercialization and contribute to the economic progress of the two countries; furthermore, to promote and encourage joint industrial R&D collaborations between firms in Korean and Israel.

KORIL-RDF supports approved joint projects by disbursing cash grants **up to 50% of the eligible R&D cost (Maximum is limited. Refer to the Project Part)**. These grants are subjected to repayment, up to but not beyond the total funded amount, should there be commercial revenues arising from the projects.

The purpose of this handbook is to provide you with clear guidelines for a successful KORIL project.

1.2. Operating Procedure

KORIL-RDF incorporated in Korea operates offices in Korea and Israel at the following locations:

- Korea Office – Headquarter
Korea Technology Center (KOTEC) 17F, 305 Teheran-ro, Gangnam-gu, Seoul 06152, Republic of Korea
Tel: +82-2-6009-8250
Fax: +82-2-6009-8254
- Israel Office
- Israel Innovation Authority, Technology Park, Derech Agudat Sport, Ha'poel 2 Jerusalem 9695102, Israel
Tel: +972-3-5118143

A Chief Executive (CE) based in Korea is responsible for the day to day administration and promotion of KORIL-RDF's activities, including the evaluation of projects submitted for KORIL-RDF funding support. The two Cooperating Authorities, MOTIE and IIA are responsible for KORIL-RDF's operations.

The day-to-day operations of KORIL-RDF are reported to the Board of Directors (BOD) which consists of eight directors, four representing the Israeli side and four representing the Korean side. BOD meetings are held twice a year to evaluate and decide on projects for KORIL-RDF funding and other businesses.

Projects submitted for KORIL-RDF funding approval are subject to technical evaluations by both countries in order to obtain expert and balanced assessment on the quality of the project applications. The BOD is the overall deciding authority of KORIL-RDF.

The BOD approves Full-Scale Projects for KORIL-RDF funding; whereas, the CE is responsible for the day to day management and operation of KORIL-RDF and has the authority to decide on Mini-Scale and Feasibility Study Projects.

KORIL-RDF actively assists companies in both countries to identify suitable candidate for partnerships. KORIL-RDF only facilitates the matchmaking process. The success of any partnership depends on the ability of the two negotiating parties to come to an agreement to work together to achieve mutually beneficial objectives.

2. KORIL-RDF PROJECTS

2.1. Guidelines

KORIL-RDF assists the companies by awarding grants of up to 50% of the eligible R&D project costs; to a maximum of USD 1,000,000.

2.1.1. Eligible Companies' condition

KORIL-RDF only funds joint development projects undertaken by **private sector companies from Korea and Israel**.

Companies eligible for KORIL-RDF funding are Korean and Israeli firms, which are registered and operate in Korea and Israel, respectively. Subsidiaries of firms headquartered and owned outside Korea and Israel may be eligible for KORIL-RDF support, when KORIL-RDF is satisfied that the subsidiary is registered in either Korea or Israel; that the proposed innovation has a global product mandate; and that the project or technology will be substantially produced in and exported from either or both Korea and Israel.

Public sector organizations, such as universities and institutions are eligible to participate as subcontractors and/or consultants.

2.1.2. Project cost

Salaries for direct R&D manpower, consumable materials, equipment, consulting services, subcontractors, project associated travel, outlays to meet regulatory requirements, and other expenses that are directly related to the joint R&D project.

It is possible to recognize depreciation or leasing costs of capital equipment required for the specific R&D project; however, the cost of outright capital equipment is not eligible.

KORIL-RDF funding is intended to support the companies' development costs up to the point of product commercial readiness. **Manufacturing, sales and marketing costs are not eligible for KORIL-RDF funding.**

At least 30% of the actual R&D cost of any individual joint project must be spent in Korea and in Israel. Thus, the ratio limitation will be either 3:7 or 7:3.

2.1.3. Others

The companies applying for KORIL-RDF funding are required to demonstrate that they themselves have, or have ready access to the resources, infrastructure, and match-funding required to complete the development project and to realize commercialization.

The primary criteria for KORIL-RDF support is that the project must be the development of an innovative & commercializable technology or technological support.

These joint R&D projects must be innovative. Technology and knowledge applications, product customization, Clinical trials (only early stages: 1-2nd stage), prototype beta-site testings, systems integration, etc., are examples of types of projects which can be considered.

KORIL acquires no equity in the companies supported and no intellectual property rights in their products. Our foundation does not interfere in formulating or managing the relationship between the partnering companies.

2.2. Project types

KORIL-RDF Projects are categorized into three types:

Project Type	Maximum R&D Budget	Maximum KORIL Grant	Maximum Term
A) Feasibility Study Project	USD 60,000	USD 30,000	3 Months
B) Mini-scale Project	USD 400,000	USD 200,000	12 Months
C) Full-scale Project	Unlimited	USD 1,000,000	36 Months

All project proposals should be jointly written in English by Korean and Israeli companies.

Project Selection Procedure

Step	Action	Executor		
		Feasibility Study	Mini-scale	Full-scale
1	Receipt of Project Proposal	Korea and Israel Offices		
2	Project Proposal Evaluation -Technological and Fiscal-	Korea and Israel Offices & Experts		
3	On-site Interview	Korea and Israel Offices & Experts		
4	Project Approval or Otherwise	Chief Executive		Board of Directors

Note: Should the feasibility effort lead to a KORIL-RDF supported Mini Scale or Full-scale Project, the amount awarded for the feasibility study will be added to the conditional grant for the purpose of repayments owed to KORIL-RDF. (See CPFA format for Feasibility Study). Otherwise no repayment is required.

2.2.1. Feasibility Study Project

Two companies (one from Korea and one from Israel) considering a R&D partnership may decide to perform preliminary investigations in order to determine the technical feasibility or market acceptability of a new product, technology concept, etc., before committing to a full-scale or a mini-scale project of much higher cost and longer duration.

In such cases, KORIL-RDF may grant up to USD 30,000 as its 50% share of the cost of conducting the feasibility study. (See the figure down below, the \$X and \$Y can be differed)

Such awards are made with the understanding that a follow-up mini-scale or full-scale project proposal will be submitted by the companies, should the feasibility results prove positive.

The Chief Executive of KORIL-RDF has the authority to approve a Feasibility Study Project. In this context, the decision may take into consideration third party expert advice from technical experts in both countries. Contingent on appropriate evaluation and assessment, the approval process will be completed in a timely manner commencing from the proposal date. Once approved, a Feasibility Study Project is implemented under a Cooperation Project Funding Agreement. (See CPFA format for Feasibility Study Project)

Project Selection Procedure (Feasibility Study Project)

The receipt of the Feasibility Study Project proposal is year-round, without a deadline.

2.2.2. Mini-scale Project

Two companies (one from Korea and one from Israel) considering a R&D project of relatively modest size both regarding costs and time duration, the Mini-scale Project is the appropriate model to be applied. A Mini-scale project is not a feasibility study project prior to a Full-scale Project, but it is a cooperative R&D project.

The maximum authorized budget for such Mini-scale Project is USD 400,000 or less, and the maximum duration is approximately one year. The maximum grant by KORIL will be up to USD 200,000, or 50% of actual project cost, whichever is lower. Commercialization is an expected goal for this project. (See the figure down below, the \$X and \$Y can be differed)

Mini-scale Project proposal guidelines are the same as those associated with a Full-scale Project.

Approvals, rejections, or changes are made by the Chief Executives. Contingent on appropriate evaluation and assessment, the approval process will be completed in a timely manner commencing from the proposal date. Once approved, Mini-scale Project is implemented under the same agreements as a Full-scale Project with adjustments for budget disbursement and term differences. (See CPFA format for Mini & Full-scale Projects)

Project Selection Procedure (Mini-scale Project)

The receipt of the Mini-scale Project proposal is year-round, without a deadline.

2.2.3. Full-scale Project

A Full-scale Project is defined as one in which the total recognized cost is over USD 400,000. The maximum duration of such project is three years. KORIL-RDF grants contribute to a maximum of USD 1,000,000 or 50% of actual project cost, whichever is lower.

The grant size will vary as determined by the BOD according to the evaluation grades for the project. (See 3.2. Evaluation and Approval)

The BOD of KORIL-RDF is mandated to make decisions regarding the approval or rejection of funding for Full-scale Project proposals. The BOD meets twice a year to evaluate and decide on Full-scale Projects for funding, and to perform other necessary businesses.

The Board's review and decisions regarding proposals are based primarily on confidential technological evaluations and due diligence performed by the IIA of Israel, MOTIE of Korea and the BOD of KORIL-RDF. **Strict adherence to the Proposal Preparation Guidelines as detailed in Section 3 is crucial for proper evaluation in this process.**

Following approval, Full-scale Project is implemented under the Cooperation and Project Funding Agreement. (See Annex 3 of CPFA format for Mini & Full-scale Projects)

Project Selection Procedure (Full-scale Project)

The receipt of the Full-scale Project proposal is twice a year, the exact dates will be published in the [KORIL website](#).

3.2. General Budget Guidelines

A. Project Duration and Start and Finish Date

Only duration of the project up to, but NOT including, actual production and sales should be included in the budgets. KORIL-RDF's funding of the project begins from the effective start date of the project, which may be from the date the proposal is received by KORIL-RDF, signed by the CEO of each company.

Expenses incurred by the companies prior to the effective start date and after the effective finish date cannot be recognized by KORIL-RDF.

- Followed by the approval of the Board of Directors, the companies will agree upon the official start and finish date of the project. This date will be inserted into Annex A (the official budget) of the CPFA signed by all three parties (both companies together with KORIL-RDF), in order to determine **the official start date and finish date** for funding purposes.

Example)

Official Project term (start and finish date):

1 May 2020 to 30 October 2022

B. Direct Labor

- Actual current eligible salary expenses consist all of the employers' cost and the taxable components (salary plus social ("fringe") benefits of employees expected to work on the project). Typically, in addition to the engineering and technical personnel, the staff includes prototyping and R&D related documentation.

NOT to be included are corporate executives (exception b.), secretarial staff, legal staff, administrative staff or staff engaged in marketing and sales activities; such expenses are included in the overhead allowance.

- Salary expenses will be recognized only for the percentage of time devoted by the employee to the project ("employment percentage") out of the total work time. Employment percentages will be calculated according to time monitoring systems (e.g. monthly time sheets filled in by the employees, time clock, job-code software, etc.). The employment percentage shall be defined as the hours invested in the project divided by the total working hours during the project duration.
 - It is required that advanced authorization be given for employment percentages for any and all managers. **Employment percentages for the managers (i.e. CEO, GM, MD, etc.) of small companies (SMEs) engaged in R&D activities shall not be greater than 50%;** excluding managers of small companies who are engaged only in the designated project. **The maximum employment percentage of those managers will be 75%.**
- The maximum monthly employment percentage is **100%**. Currently, the maximum recognized annual cost per full-time employee is **USD 100,000**.
 - Overhead (O/H):** Include all indirect labor cost, secretarial services, legal staff, etc. 25% of Direct labor's subtotal is O/H.

% time on project during the duration period is equal to the product of:

Gross Annual Salary (include social benefits)	X	% on Project (Direct Labor)	X	Participating Months (Months of Participation/Project Duration)	=	Cost To Project USD
---	----------	---------------------------------------	----------	---	----------	--------------------------------

Example)

If your Annual Salary is USD 80,000, % on Project is 60%, and the Period duration is 6 months, your Cost to Project will be : 80,000 X 60% X 6 / 12 = 24,000

4.5. Ongoing Project – Change Request and Authorization

As stated in the CPFA 4.5:

*“The Participant shall not make substantial transfers of funds from one official budget item to another, change key personnel or their duties and responsibilities or re-schedule their time allocated to the proposed work hereunder **without prior written approval by KORIL-RDF**, which approval shall not be unreasonably withheld.”*

In order to enable changes stated above to be authorized in accordance with KORIL-RDF regulations, the following procedures have been established.

A. Work Plan Change Request

An official request letter to CE, KORIL on company letterhead, signed by both companies.

Clearly set out the items approved original version to be changed along with the reason for the change. The requested change should be listed alongside to enable KORIL-RDF to review appropriately and determine the validity of said requests.

The request must be submitted via e-mail to both Korean and Israel offices of KORIL. At the same time, the Israeli company needs to submit the request in the IIA's online system, in their “Personal Zone”.

B. Budget Adjustment Request

An official request letter to CE, KORIL on company letterhead, signed by both companies.

Present the original official authorized project budget (from signed CPFA). Clearly designate the specific items originally approved which are to be changed along with the reason for change. List the requested changes alongside to enable KORIL-RDF to review appropriately and determine the validity of said requests.

The request must be submitted via e-mail to both Korean and Israel offices of KORIL. At the same time, the Israeli company needs to submit the request in the IIA's online system, in their “Personal Zone”.

5. REPORT GUIDELINES

5.1. General

All technical reports must be prepared jointly by both companies and submitted to both KORIL-RDF offices in Korea and Israel, simultaneously. At the same time, the Israeli company needs to submit the reports in the IIA's online system, in their "Personal Zone".

Fiscal reports are to be prepared by each partner company as per guidelines according to its official budget and submitted to the respective KORIL-RDF country office together with the joint technical report.

All such reports must be submitted to and approved by KORIL-RDF prior to the transfer of all grant payments except for the initial grant payment made on execution of the Cooperation and Project Funding Agreement (CPFA).

- **Mini-scale & Feasibility Study Projects:** Due to the nature of these projects, **NO Interim Reports are required.** Only Final Technical and Fiscal Reports are to be submitted **within 60 days of the completion of the project.**
- **Full-scale Project:** The Technical and Fiscal Reports for Interim and Final **Evaluation are to be submitted within 30 days following the expiration of the Interim and Final segment of the project.**

Likewise, Final Technical and Fiscal Reports are **to be submitted within 60 days** following the completion date of the project or final project period for those projects with multiple periods.

5.2. Technical Report

Technical reports submitted to KORIL-RDF will be treated as confidential to the extent described in the Confidential Disclosure Agreement (CDA). Nonetheless, proprietary or commercially sensitive information should be identified as such.

The purpose of the technical report is to enable KORIL-RDF to monitor project progress and to justify any adjustments or modifications incurred by the project to the original work plan (as detailed in Annex C of the CPFA); furthermore, to provide KORIL-RDF a viable basis for continued disbursement of the grant award.

Results of unusual interest should be highlighted.

As a contributor to the project, KORIL-RDF may request for informal reports, without prior notice, in attempt to be kept informed of the project's status.

5.3. Fiscal Report

The purpose of the fiscal reports is to enable KORIL-RDF to monitor actual expenditures on the project and to assist in decisions relating to the continued funding of the project.

5.4. Project Completion

5.4.1. Commercialization Report

Commercialization is to be reported to KORIL-RDF on a semiannual calendar basis commencing from the completion date of the project. Reports are **due within three months following the end of each semiannual period**. Standard reporting format is to be used. **Commercialization report form can be down-loaded from the KORIL-RDF website.**

Commercialization activities can be in the form of any of, but not limited to, the three primary categories as defined in the CPFA.

1. **Gross Sales** – Include all product revenues from the “sale, leasing, or other marketing or commercial exploitation of the Innovation, including service or maintenance contracts.” Repayments are made at the stated repayment rate (in the CPFA); generally at 2.5% of the Gross Sales.
Please note that the “Date of First Sale” is important for those agreements in which the repayment rate changes following the first year of sales. The date of first sale will be used to determine when to implement the change in repayment rate.
If the repayment rate changes during the current reporting period, the gross sales amount must be allocated into two amounts, i.e., sales during and subsequent to the first year of commercialization.
The appropriate repayment rates shall then be applied. The form allows for both sales and repayment information to be reported.
2. **Revenues resulting from sales patented inventions** – Covered in Clause 8 and Annex D of the CPFA. The grant repayment rate on these revenues is 2.5% and repayment becomes due as detailed in Subsection 4 of Annex D.
3. **Revenues derived from license Agreements** – Described in Annex E of the CPFA, are subject to repayment to KORIL-RDF at the rate of 30%.

It should be noted that cumulative repayments and royalties due to KORIL-RDF, from any and all source of revenues, are not to exceed 100% of the grant funds actually awarded to the participants.

For more details regarding the regulations for commercialization activities, refer to CPFA attachment Clause 3, and Annex D and E.

5.4.2. Repayment of Grant

KORIL-RDF Grant is subject to repayment, up to but not beyond the total funded amount. Repayments are made at the stated repayment rate generally at 2.5% of the gross sales.

Companies may repay the Grant in any amount in the years following the first commercial transaction as set out below until the maximum percentages as stated below have been satisfied in which event no additional payments to KORIL-RDF shall be required.

- The Participants may repay the Grant and any other sums in USD at the rate of 2.5% ("Repayment Rate") per year of the Gross Sales for that year, until 100% of the Grant and Other Sums have been repaid.
- The Participants may repay the Grant and other Sums in any amount in the years following the first commercial transaction as set out below, until the maximum percentages as stated below have been satisfied in which event no additional payments to KORIL-RDF on account of the Grant and Other sums shall be required for that respective year, excepting interest payments that may be applicable to be repaid in accordance with clause 3.9 of CPFA.

Years Following the First Commercial Transaction	Maximum Percentage of Grant and Other Sums to be Repaid
Year 1	50%
Year 2	60%
Year 3	70%
Year 4	80%
Year 5	90%
Year 6+	100%

3. REPAYMENT OF GRANT

Sale of products of the Innovation

3.1 Each Participant shall, jointly and severally, make payments to KORIL-RDF based on Gross Sales derived from the sale, leasing or other marketing or commercial exploitation of the Innovation, including service or maintenance contracts, commencing with the first such commercial transaction. Such payments shall be based on the following:

- (a) The Participants may repay the Grant and any Other Sums in US Dollars at the rate of 2.5% ("Repayment Rate") per year of the Gross Sales for that year, until 100% of the Grant and Other Sums have been repaid.
- (b) The Participants may repay the Grant, and other sums, in any amount in the years following the first commercial transaction as set out below, until the maximum percentages as stated below have been satisfied in which event no additional payments to KORIL-RDF on account of the Grant and Other Sums shall be required for that respective year, excepting interest payments that may be applicable to be repaid in accordance with clause 3.9

Years Following the First Commercial Transaction	Maximum Percentage of Grant and Other Sums to be Repaid

Year 4	80%
Year 5	90%
Year 6+	100%

In the computation of the Gross Sales, no costs incurred by the Participant in the development, design, manufacture, sale, distribution or exploitation of the products shall be deducted from the Gross Sales. In any sale or disposal of any products of the Innovation or part thereof otherwise than in an arm's length transaction or otherwise than for money, the Gross Sales shall be the fair market value (if higher) of such products in the relevant country of sale or disposal. The term "Gross Sales" shall also include all specific export incentives or bonuses paid to the Participant on account of sale of the products of Innovation for export, but shall not include sums paid for commissions, brokerage, value added and sales taxes on the sale of the finished product, or transportation and associated insurance costs, if same have been included in the gross sales price.

Notwithstanding the aforesaid, if there shall have been established a market price for the Innovation, such price shall be the basis for payments according to Clause 3, notwithstanding the incorporation of the Innovation in another product.

3.5 In the event a Participant obtains a patent in accordance with Clause 8 in respect of an Innovation and such patent is licensed to other third parties for the sales of any products embodying the Innovation or made by practicing the Innovation, unless such Participant is making payments to KORIL-RDF under the other sub-clauses of Clause 3, the Participant shall pay to KORIL-RDF a grant repayment on sales of such products, in accordance with Annex D.

3.7 Licensing of technology or Innovation:

If any Innovation or any technology developed under this Agreement becomes the subject of any licensing, the Participant shall pay to KORIL-RDF a grant repayment in accordance with Annex E.

3.9 This Clause 3 shall survive termination of this Agreement, and to the extent of any obligation to make royalty payments under this Agreement, such obligation shall continue for the life of the last-to-expire patent issued on any invention made in whole or in part arising from the implementation of the Proposal. All payments due to KORIL-RDF and not paid by the participants under this Agreement shall bear interest at 1% more than the average prime rate prevailing at Citibank, Seoul for the Korean participant, and 1% more than the average prime rate prevailing at Citibank, Tel Aviv for the Israeli participant, during the period from the date payment was due until the date payment is completed.
